e-Government – Portal Project

Background

In 2000 the Kuwaiti Government established a National Committee called Central Technical Body (CBT) to supervise the establishment of its e-government project. The first task was to set up a web presence and build an e-government portal that would initially be an informative website, before evolving into a multi-faceted Portal.

The Challenge

FAPCO won the tender, issued to certified vendors, for a project which consisted of:-

- Portal development
- Content management
- Application development
- Data input
- Maintenance for a period of one year
- Supply of hardware.

Technology Utilized

Development: .NET

Database: Microsoft SQL Server 2000

Content Management: FAPCO Proprietary

ISSA: FAPCO Proprietary

Portal: FAPCO Proprietary

The Solution

FAPCO developed a state-of-the-art content management tool and Portal using .NET technology. The Portal has standardized modules ranging from the HTML editor to video, weather and library modules and also offers an easy-to-use interface. The e-Government Portal was successfully launched in October 2003, offering a complete repertoire of services and information.

The Benefits

FAPCO's solution.....

- ✓ Used flexible modern technology
- ✓ Provided an enhanced web presence
- ✓ Operates in line with Kuwait's e-strategy
- ✓ Increased public awareness of services

Case Studies
